St. Jude Children's Research Hospital

**Dear Hiring Manager,**

I am writing to express my enthusiasm for the opportunity to join St. Jude Children's Research Hospital as an Intern. St. Jude's commitment to advancing cures and means of prevention for pediatric catastrophic diseases through research and treatment resonates deeply with me, and I am eager to contribute to the impactful work your teams are known for, particularly in improving patient care and outcomes.

My journey in the field of science began at a young age, and I've been consistently inspired by St. Jude's groundbreaking research and compassionate approach to patient care. As a third-year Computer Science student at the University of Texas at Dallas, I bring over five years of programming experience and a strong foundation in data structures, algorithms, and software engineering. I've honed skills in Java, C++, Python, and Machine Learning, which I believe can be valuable in supporting St. Jude's research efforts.

I am particularly inspired by St. Jude's commitment to freely sharing knowledge and discoveries with the scientific community worldwide. The thought of joining a team that continuously pushes the boundaries of medical research to save children's lives fuels my passion for applying technology to solve critical health challenges. My technical skills, dedication to quality, and enthusiasm for learning make me confident in my ability to contribute to St. Jude's mission.

Thank you for considering my application. I would welcome the opportunity to discuss how my experiences align with St. Jude's goals and explore how I can contribute to your team's success in advancing lifesaving research and treatment for children.

**Sincerely,**

Aaryaa Moharir
